Social media: Linkedin | Github | Portfolio
Address: Mohadevpur, Naogaon, Rajshahi

Work summary

I always divide each task into three parts. In the first part, I build the project's structure using HTML, CSS, bootstrap, tailwind-CSS or material UI, react, etc. In the second part, I do functionality-related work like authentication, data fetching, server, database, etc. And finally, in the third part, I make the project attractive by completing its design part. Vs code, GitHub, and Google search engine seems to be my daily companion

Skills

Front end: Javascript, React js, Firebase, Material UI, Bootstrap, Tailwind, React router.
Backend: Node js, Express js, MongoDB, MySQL
Tools & Softwares: Vs code, Git, Heroku, Netlify, Figma, Chrome dev tools

Experience

● Software Engineer (**Intern**)
Wizard Software & Technology Bangladesh Ltd. (WizTecBD)
52/A Lake Circus Rd, Dhaka 1205
April 2022 – Present

Projects

Pick-A-Book: LIVE SITE | CLIENT-SIDE CODE | SERVER SIDE CODE
Technology: React Js, React Router, Firebase, Material UI, Node Js, Express, MongoDB, Heroku, Multer, **hosted on Namecheap**.

Admin email: admin@gmail.com
Password: admin123

Project Overview:
● This is a book-selling website where users can find a book from so many categories or find it by searching.
● Users can read some pages of a book before buying (as pdf) and give reviews and ratings and buy a book by two types of payment system (cash on delivery, card), also user can track their order.
● Modern, beautiful, and fully responsive design with clean and maintainable react components.
● Fully functional admin panel available where admin can add a book with images, pdf, and

other information. admin can track, confirm, delete orders and make a new admin .

QUADEX: LIVE SITE | CLIENT-SIDE CODE | SERVER SIDE CODE
Technology: React Js, React Router, Firebase, Material UI, Node Js, Node Express, MongoDB, Heroku.
Project Overview:
- Functional Drone Shop web application using MERN stack.
- Users can book their Products and view their order details on the DASHBOARD.
- The Admin panel is available only for the admin. An admin can manage all orders and can add a service and make a NEW ADMIN.

ROAM: LIVE SITE | CLIENT-SIDE CODE | SERVER SIDE CODE
Technologies: React Js, React Bootstrap, Firebase, Node Js, Node Express, MongoDB, Axios, Heroku.
Project Overview:
- A fully functional, full-stack Travel agency website.
- Users can book any tour packages if they are logged in and can also view their orders on the Dashboard.
- Admin can update order status from pending to approve.
